

Flawless performance show after show...

DTS products provide high-quality surround sound playback plus extra features and functionality not offered by competing products. And all DTS products use the same patented CD-ROM technology to deliver a single-print solution for cinemas.

**One film print + DTS system = Easy programming
and playback (no re-plattering needed).**

XD10 Cinema Media Player

An innovative hard-drive based unit for digital sound playback up to 10 channels, plus enhanced video for alternative content and pre-show. Upgrade with DTS-CSS functionality.

XD10P Cinema Audio Processor

When connected to the XD10 media player, the XD10P forms a complete end-to-end 8-channel playback system for a total digital audio presentation.

CSS Cinema Subtitling System

The industry's leading solution for delivering foreign language subtitles, open captions and audio description, using a single film print.

the spirit
of sound
