

# Lease

Your own Pre-show advertising  
and lobby trailer equipment.

Why would you sign a contract with a production company that may take up to 70% of your pre-show advertising revenue to produce your commercials and lease the video equipment (which you never own?) **PanaMedia Capital Leasing** will lease the equipment at very competitive rates and you will own the equipment at the end of the lease period for 1 dollar. This allows you to install top quality equipment and pay for it while you earn income from your advertising. You can hire and fire your choice of production companies and have complete control of your program. In addition to the professional video projectors and PanaMedia pre-show equipment you may add flat screen video monitors for lobby trailers with the material supplied by the same PanaMedia system that presents your pre-show material. Our system is miles ahead of the competition in quality and features. Most commercials are delivered to you via the Internet by the production company and is totally unattended by your staff. You will find information on our website at [www.panamedia.us](http://www.panamedia.us) or [www.panastereo.com](http://www.panastereo.com)

## Why not lease *ALL* of your booth equipment at the same time?

**PanaMedia Capital Leasing** is underwritten by one of the leading leasing banks in the U.S. and can include All of your booth equipment, and in some cases, your concession equipment, in the same lease. Qualified prospects can get up to one million dollars of equipment under the lease. The beauty of the plan is that you don't disturb your other bank or financial arrangements or "lock up your credit." You can now buy top of the line PanaMedia, Panastereo, DTS, SMART, factory wired sound rack, automation and dimmers, and your choice of projectors, lamphouses, platters and other booth equipment. Only in the U.S.

See a demonstration of the AMAZING  
PanaMedia system at the Australian Movie  
Convention is August at Surfer's Paradise.  
Learn all the details at a technical seminar  
presented by our sister company Panalogic,  
Corporation of Sydney, Australia.
